

## Fonts by David Kerkhoff - License & FAQ

### **PURCHASING FULL FONT(S) & LICENSING**

I no longer sell my fonts myself - instead you can buy them from several professional font websites like [myfonts.com](http://myfonts.com) or [fontspring.com](http://fontspring.com)

On my site [www.hanodedfonts.com](http://www.hanodedfonts.com) you will find links to these and other sites. Just choose where you would like to purchase the font(s) of your choice from and click on the link. If you have any licensing questions, please contact customer support of the site you want to buy my fonts from. Do NOT contact me about licensing questions.

- 1) Scrap-bookers: you cannot sell my fonts as part of a 'Scrap Booking Kit';**
- 2) You cannot use demo fonts for your apps, games and software. You will need to purchase the appropriate license from my website [www.hanodedfonts.com](http://www.hanodedfonts.com);**
- 3) The copyright of ALL of my fonts remains with me, David Kerkhoff. (Demo) fonts are licensed, not sold;**

#### 4) Demo Fonts vs Full Fonts

The demo versions of my fonts are free for PERSONAL, NON COMMERCIAL use only. For example: you have a school project and want to use my font for the title or you want to send your grandma a handmade birthday card.

My older demo font have the letters DK in front of the name; the latest fonts have the word DEMO behind the name. If you want to search for fonts, please just type the name without DK or DEMO.

I get a lot of mails from people who try to worm their way out of buying a license by telling me that -

1. their internet shop is very small;
2. they have no money to buy fonts;
3. they will probably just make a small profit;
4. some other bullshit

Well, tough break, get a fucking license and stop begging. If you don't like it, then make your own fonts.

And please, DO NOT CONTACT ME ABOUT HOW TO INSTALL A FONT. You will find lots and lots of instructions and how to's on [dafont.com](http://dafont.com) and [fontspace.com](http://fontspace.com)

This info file has some affiliate links, which I use to link to my own fonts. Please read my disclosure [here](#).
