YORK �֍ WHITELETTER

York Whiteletter is a 'wood type', with a twist. Inspired by a Delittle design called 'Eboracum №3 Improved White Letter Type'. York Whiteletter can be used monospaced, but ligatures are included to improve the fit of common kern pairs. Numerous ends and ornaments are included. Enable Ligatures and use the Glyphs Palette or Character Map to add end pieces and ornaments (see your apps/OS documentation on how to insert 'special characters' from a font).
Glyph maps included in the zip file showing both glyph image and Unicode.
